

**FT72C TuffGuard Competition Backboard Padding**

1. **PADDING CONSTRUCTION** - Padding shall be molded to meet or exceed all standards set forth by the NCAA, NFSHSA, and FIBA. Padding shall be cellular construction with a skin of average minimum thickness of .06". The skin shall be a minimum 125 psi. The padding system shall be capable of mounting to all brands and styles of rectangular backboards by means of eight bolts (provided). A steel track molded into the padding shall provide rigidity and strength to the mounting system. The two "L" shaped padding segments shall be joined in the center via two alignment pins. The corners of the padding shall be molded square for maximum safety and shall not require mitering, gluing or forming for attachment. All hardware shall be zinc-plated. Padding system shall be available in a variety of colors. Colors shall be continuous throughout the thickness of the padding, not only the skin. Padding shall carry a 10-Year Superior Warranty. Approximate shipping weight 15# each.
